SUMMARY

Computer Engineering student with a passion for developing impactful software applications. Skilled in C++, Python, Core Java, SQL, Git, and Flutter for Android development, with hands-on experience creating user-friendly applications such as a library management system, sticky note app, and Printify(working) platform. Known for strong problem-solving abilities, attention to detail, and dedication to building responsive, full-featured designs. Seeking an internship to further develop technical skills and contribute to innovative projects.

WORK EXPERIENCE

CORDINATOR   2022 - 2024
SKN COADING CLUB

- I have fostened a competitive environment through organizing coding events, seminars, and workshops. This role has enriched my leadership and team management skills while enhancing my proficiency in event organization. The experience has been instrumental in both my personal and professional growth, equipping me with practical skills vital for my future endeavors.

VOLUNTEERING INTERNSHIP   2018 - 2020

- Currently, I am serving as a Volunteer Web Developer for a Socium Partners Free Lancers Organization, where I leverage my skills in Web Development to design and construct a user-friendly website. In this role, I utilize my technical expertise to support their mission, enhancing their online presence and accessibility fordiverse audiences.
